- **Frameworks:** React, Tailwind, Vue.js , FastAPI.
- **Databases:** MySQL, SQL.
- **Tools:** Git, Jira, Pytest.

EXPERIENCE

Full-Stack developer | IDF | 2023- April 2025

- **Led the architecture** of two critical projects, collaborating directly with clients.
- Developed robust **scalable applications** using React, FastAPI, and MySQL.
- Managed end-to-end delivery **from planning to deployment**.

Software web developer in Logiciel | 2020-2021

- Delivered **high-quality frontend interfaces** using Vue.js, JavaScript, HTML, and CSS for multiple clients.
- **Integrated backend APIs** and maintained cross-functional communication.
- Conducted code reviews and **ensured adherence to best practices**.

SELECTED PROJECTS

Zoom License Automation System

- Automated Zoom scheduling across military units, replacing a slow manual process with a full-stack platform: user sign-up, approvals, availability checks, and auto assignment.

Attendance Tracker

- Built a scalable check-in tool for large military events, with bulk user uploads, ID scanning, and real-time reporting.
